

APPENDIX D-1. Summary of stocking by the North Carolina Wildlife Resources Commission in streams in the Catawba River basin. Data are derived primarily from unpublished stocking records. Because the stream records were filed by county, and not by river basin, data for streams with common names or crossing county boundaries could not always be distinguished. Streams for which the data could not be clarified are in italics and should not be considered reliable. Data in the files for unknown streams were not included. Streams stocked since 1990 are bold.
